## Automatic Transmission Fluid Conversion Chart

- FULL THROTTLE HIGHLY FRICTION MODIFIED ATF SUPPLEMENT
- FULL THROTTLE M-V ATF SUPPLEMENT

Convert Dexron® III/Mercon® into Highly Friction Modified or Mercon® V ATF for specified fluids  
 — See **Product Fact Sheets** for Description, Features & Benefits and Directions

**Check owner’s manual or dipstick for proper fluid type**

### Directions for using chart:

1. In your **Transmission Specification Guide**, find the vehicle year, make and model. Note the transmission’s capacity in quarts and the manufacturer’s specified fluid.
2. If the manufacturer specifies AF2, AF3 or MA, apply your bulk Dexron III/Mercon fluid with no modifying supplement.
3. If the manufacturer specifies any other fluid, refer to this chart to determine if the Dexron III/Mercon fluid can be modified with either the gray bottle of **Highly Friction Modified ATF Supplement** (EA 61) or the blue bottle of **M-V ATF Supplement** (EA 62). Note *Exceptions*.
4. If the fluid is not listed on this chart or is listed as an *Exception*, you must apply the OE fluid.
5. When modifying fluid, apply one (1) 10 oz. bottle of the proper ATF Supplement for up to 11 quart capacity. For capacities greater than 11 quarts, add one (1) additional ounce of ATF Supplement for each quart of capacity greater than 11 quarts. Always add modifiers to the vehicle, not the flush machine’s new fluid tank.

Vehicle Manufacturer – OE Fluid <i>Exceptions</i>	Year	Dexron III/Mercon plus Full Throttle HFM ATF Supplement Part # FTA 61	Dexron III/Mercon plus Full Throttle M-V ATF Supplement Part # FTA 62
<b>Chevrolet/Geo/Pontiac</b> – T-IV ATF; A245E or MS7 4 speed, V341E, V341F, MU4 and MU5 transmissions	2003 - 2005	<b>HFM gold label # FTA 61</b>	
<b>Chrysler, Dodge &amp; Plymouth</b> – Mopar ATF+3 (7176) ATF+4 (9602) <i>Except 2004 – 05 NAG1 5 Speed SLF (Shell 3402) only</i>	1981 - 2005	<b>HFM gold label # FTA 61</b>
